Fix It Up Collage

STEPS:

1. Using old worksheets, maps, book pages, sketchbook pages, old artwork you don't want anymore etc. Cut up into shapes. Paint the pieces before and/or after you cut them up.
2. Glue down (optional: seal with Mod Podge)
3. Draw on top of the collage with oil pastel or markers to create an additional layer.

Materials:

- Scrap papers
- Glue sticks
- Scissors

Optional: mod podge, paints, oil pastels, sharpies

Note: This project gets a "3" rating because it will take time to build up the layers and let each layer dry. This could be broken up into several days and retured to over time.

Project Short Cuts and Do Aheads

1. Keep a designated ‘save box’ or bin your classroom for scraps of paper for collage (think: maps, art, worksheets, etc). Tell students not to throw away their art, but put it in this box.

2. When you’re ready to paint, cover the tables with newsprint for easier clean up. Keep a few scraps of this newsprint and add it to your save box!

3. Set up a station for table groups to collect & return additional art supplies. YOU don’t have to do this, you just have to teach students how to get and return items.

Additional Instruction

1. You get to decide the size of the art piece. Use half of a file folder, cardstock paper, or a piece of construction paper as the substrait (the paper you glue everything onto). Limit the size of paper will minimize the amount of time needed.

2. You can suggest a theme for this project to get a cohesive look. Suggestions: flowers, fruit, cat, etc. Look at the prompt list for more ideas on a theme.
